

## Intra. 295 range

Intra  
Design: Phoenix Design

Model 295/7

Model 295/6

Nowadays, styles of working that require people to liaise with one another frequently are increasingly being encountered in management spheres too. These are areas where new design concepts are just as welcome as more movement in sedentary workspaces to keep body and mind agile. Which is why the Intra chair range combines a contemporary and compelling design language with dynamic movement options.

The chair's seamless looking seat shell, its organic lines, sophisticated upholstery and integrated controls bear testimony to a modern understanding of management culture. With precision-adjustable height and a synchronous adjustment mechanism fitted to the seat, the chair adapts automatically to people of different weights. All they need to do is sit down, adjust the seating height and get down to the job at hand. Meetings could hardly be more agile.

Medium-height backrest

**295/8**  
High backrest

Three backrest heights and base frames with casters or glides make these chairs ideal for a variety of settings ranging from offices or boardrooms.

The levers for changing the height and operating the synchronous adjustment mechanism are also fitted discreetly into the armrests and seat shell. The automatic weight adjustment feature ensures that the slightest shifts in weight encourage a healthy change of posture. If no movement's required, the backrest can be locked in a vertical position.

The carefully modeled star bases are optionally available with chrome-plated or black glides or modern casters. The difference in height is compensated for by gas springs in different heights, so that both models have the same adjustment range and can be combined accordingly.

In the high backrest model, in addition to the top-stitched "wing backs", an integrated head/neck rest ensures maximum relaxation and divides up this section of the chair neatly.
